CUBING CLASSROOM

How to solve a
3x3 Cube

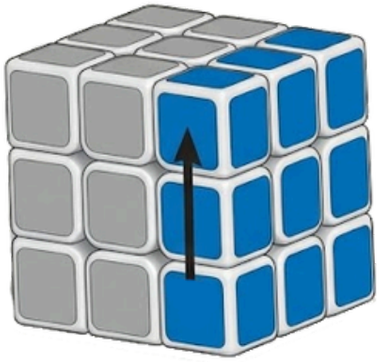

A 3x3 cube consists of 26 small pieces and 1 core, 6 center pieces are fixed on the core, 8 corner pieces with a 3 colors and 12 edges pieces with 2 colors.

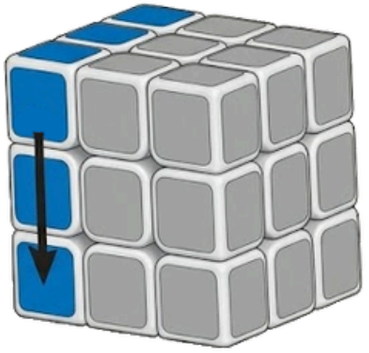

Structure of a 3x3 cube

3x3 cube beginner's method

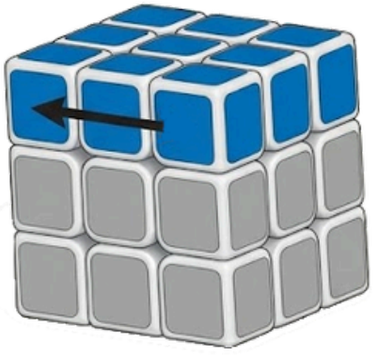

Notation used in solving the cube:
U(Up), D(down), F(Front), B(Back), L(Left), R(Right)

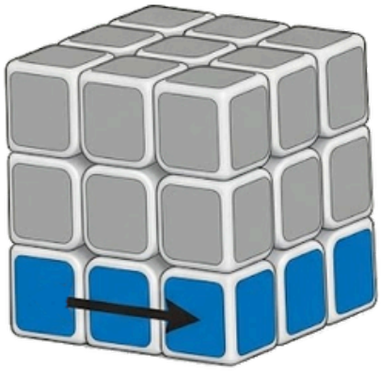

R

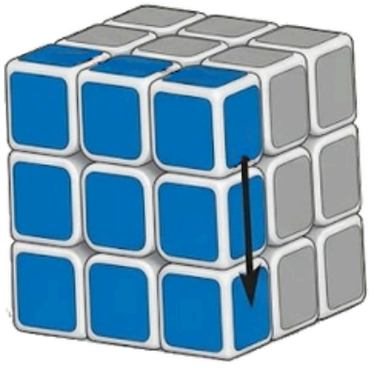

L

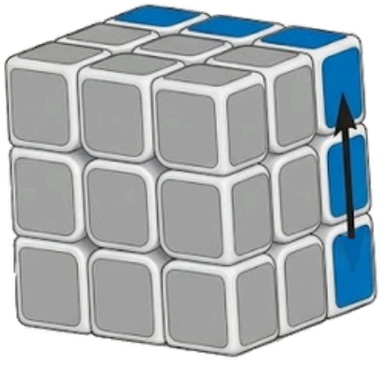

U

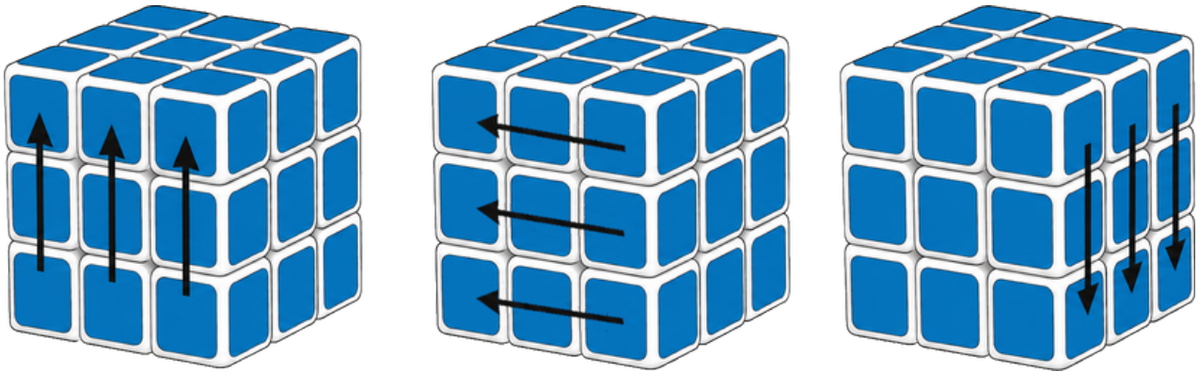

D

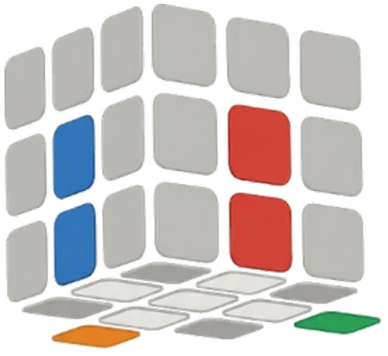

F

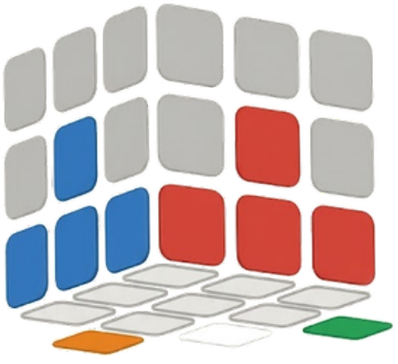

B

STEP 1. Make a cross on the bottom layer

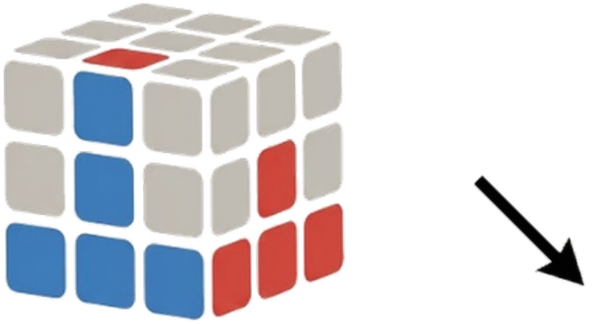

STEP 2. Solve edge pieces on the bottom

STEP 3. Solve edge pieces on the middle layer

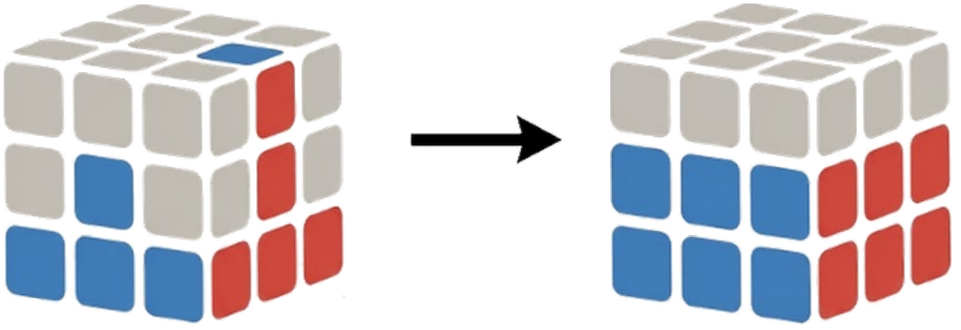

Case 1

Alg 1: F U F U F U’ F’ U’ F’

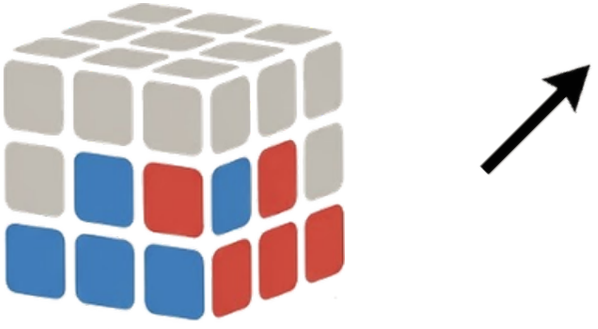

Case 2

Alg 2: R’ U’ R’ U’ R’ U R U R

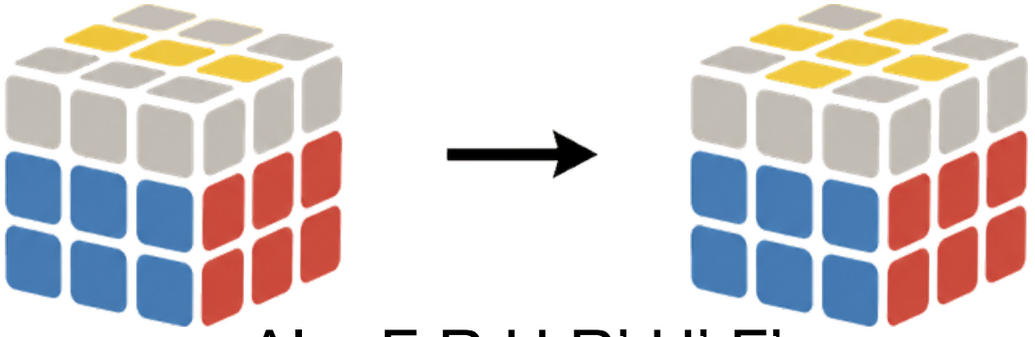

Case 3

Alg 3: R U U R’ U R U U R’ U F’ U’ F’

STEP 4. Make a cross on the top layer

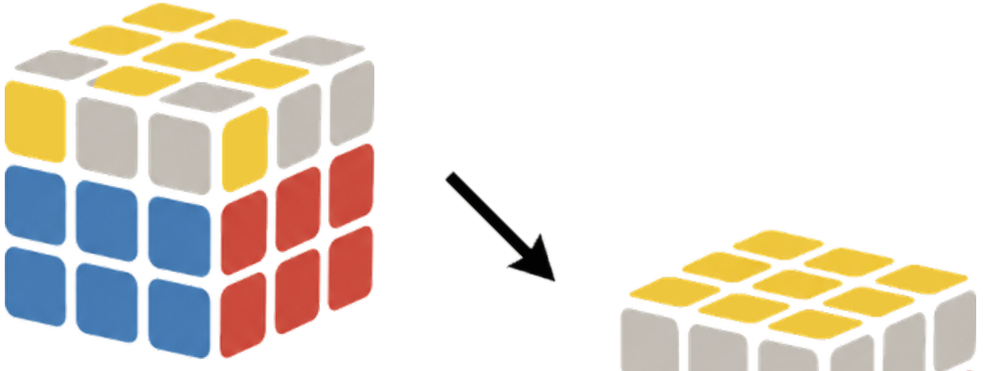

In this step you will make a cross on the top using an algorithm. You may have to repeat it a few times depends on different case

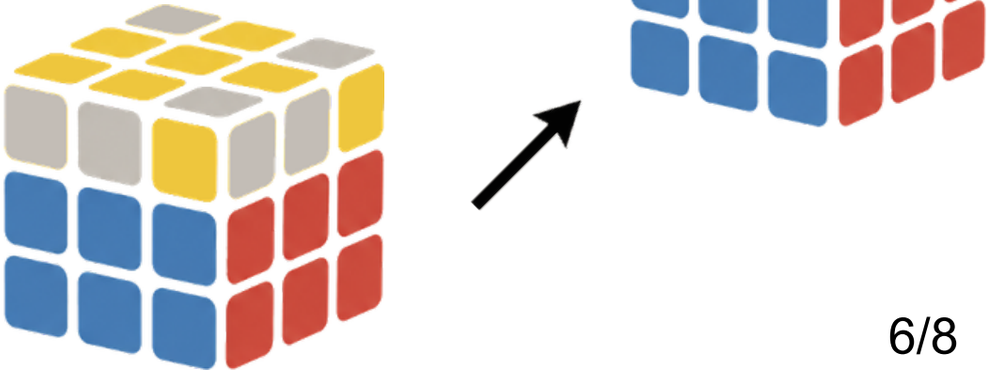

Alg: F R U R’ U’ F’

STEP 5. Solve the top face

Alg 1: R’ U’ R U’ R’ U2 R

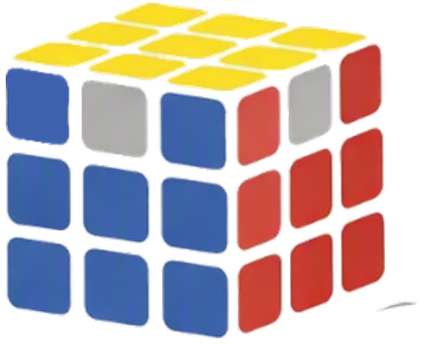

Alg 2: R U R’ U R U2 R’

STEP 6. Position top corners correctly

Alg 1: R2 F2 R’ B’ R F2 R’ B R’

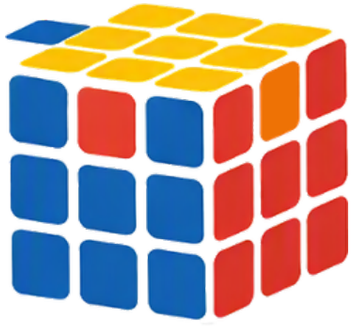

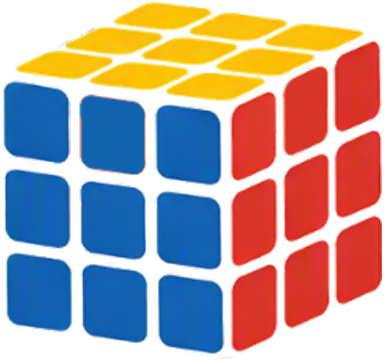

Alg 2: R B’ R F2 R’ B R F2 R2

STEP 6. Position last fews edges correctly

Alg 1: R U’ R U R U R U’ R’ U’ R2

Alg 2: L’ U L’ U’ L’ U’ L’ U L U L2
