CUBING CLASSROOM

Pyraminx instructions

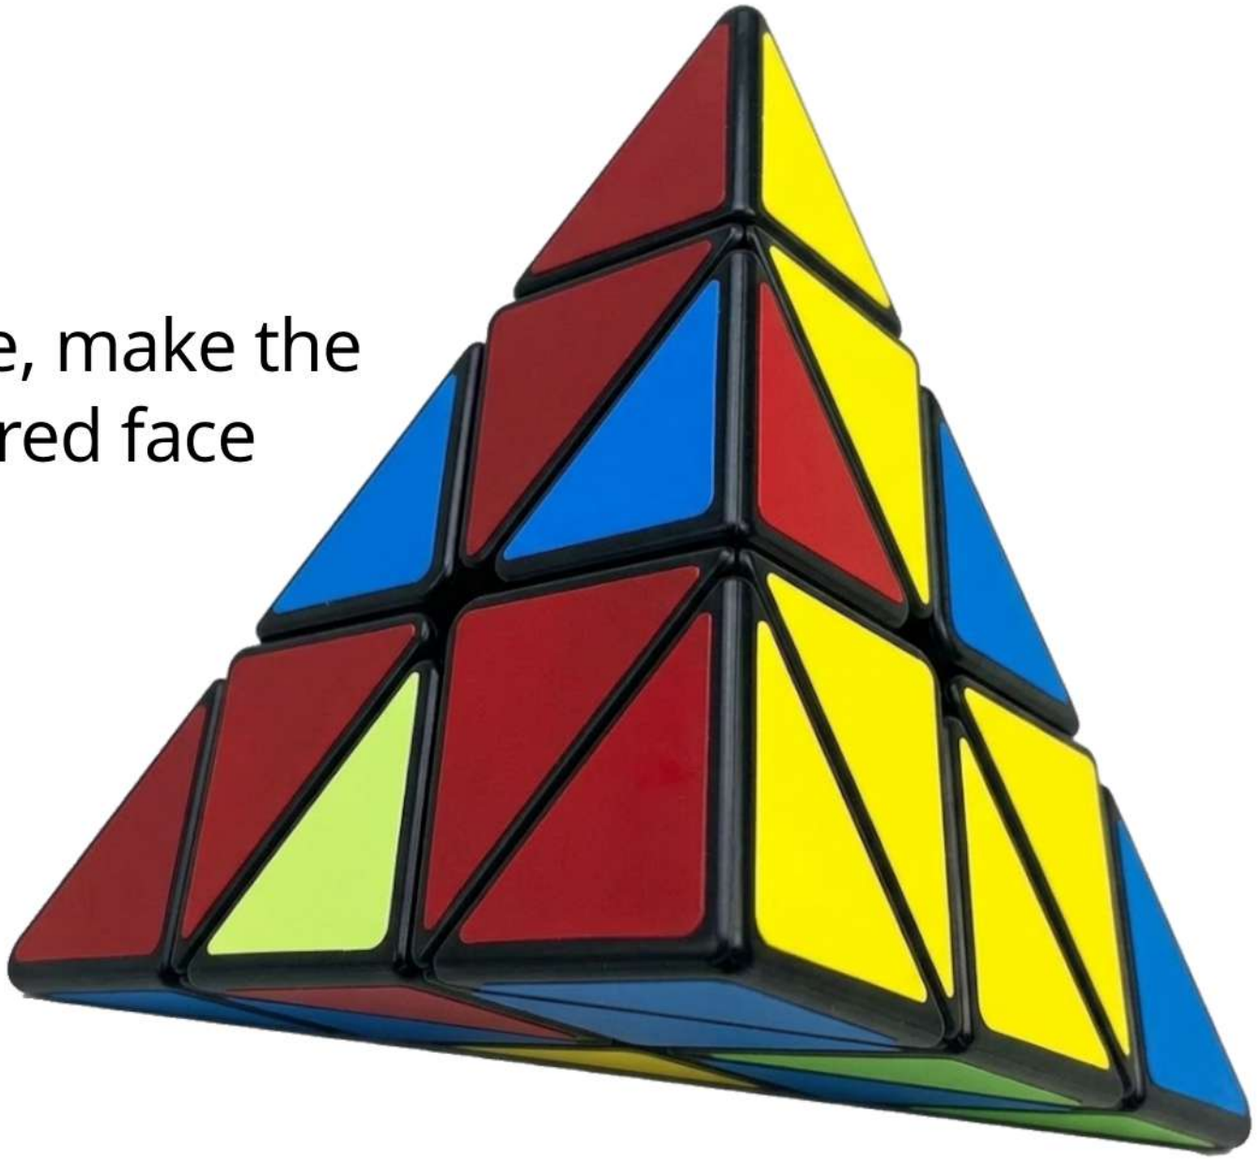

Construction
and
regulating unit

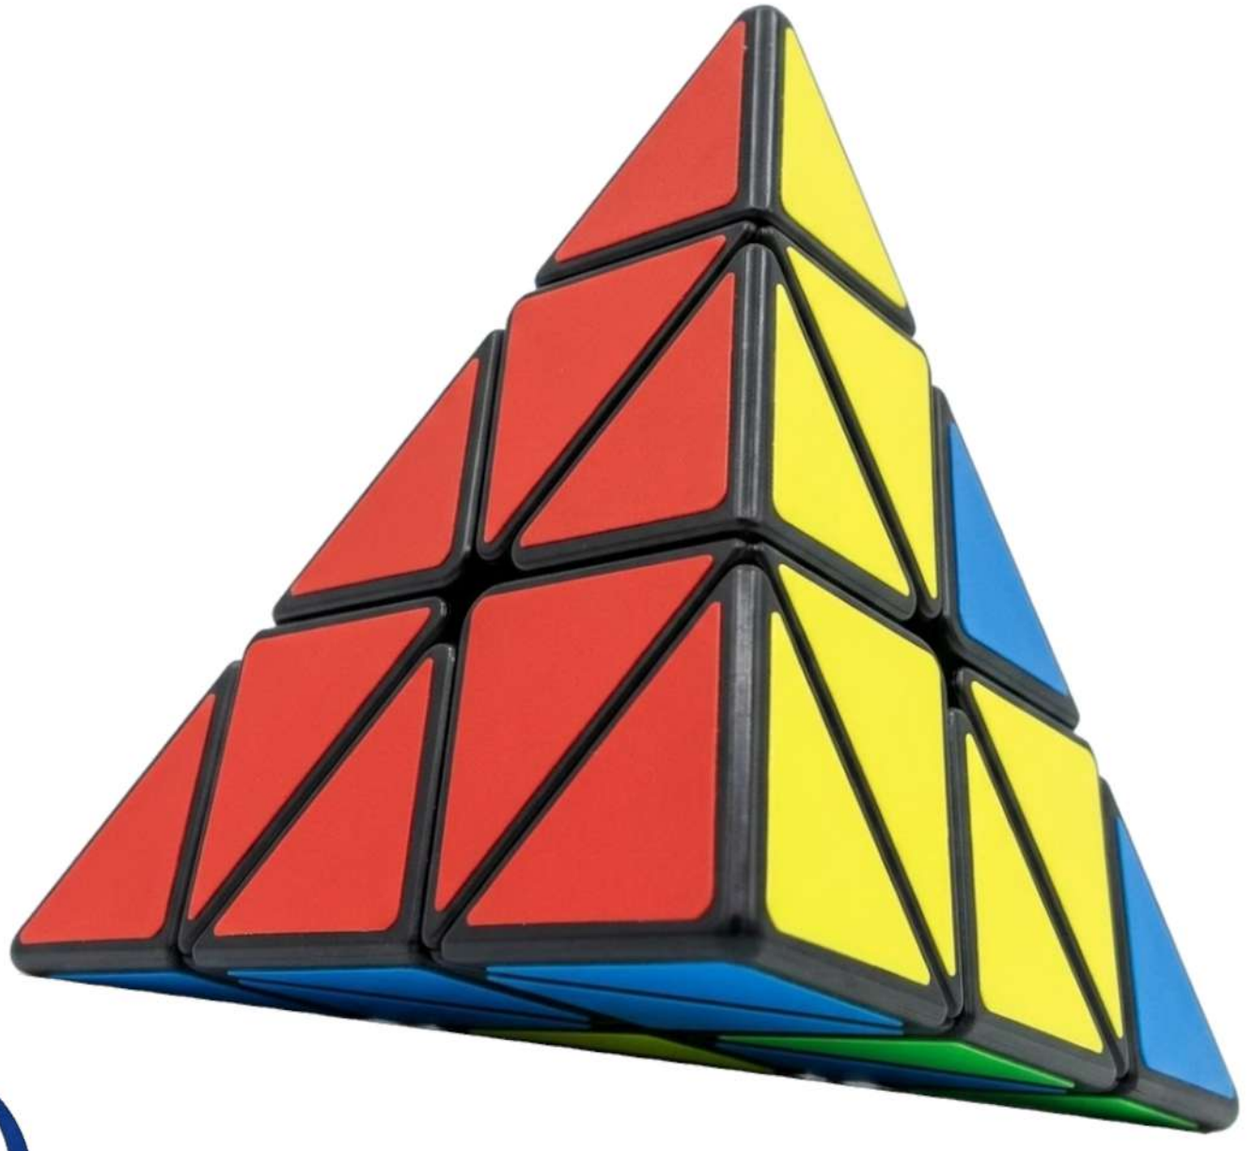

Normal definition

Angle block on the base block rotate freely, in the reduction process angle block does not play any role, can be neglencted

Rotate cube, make the 3 blocks of red face in a plane;

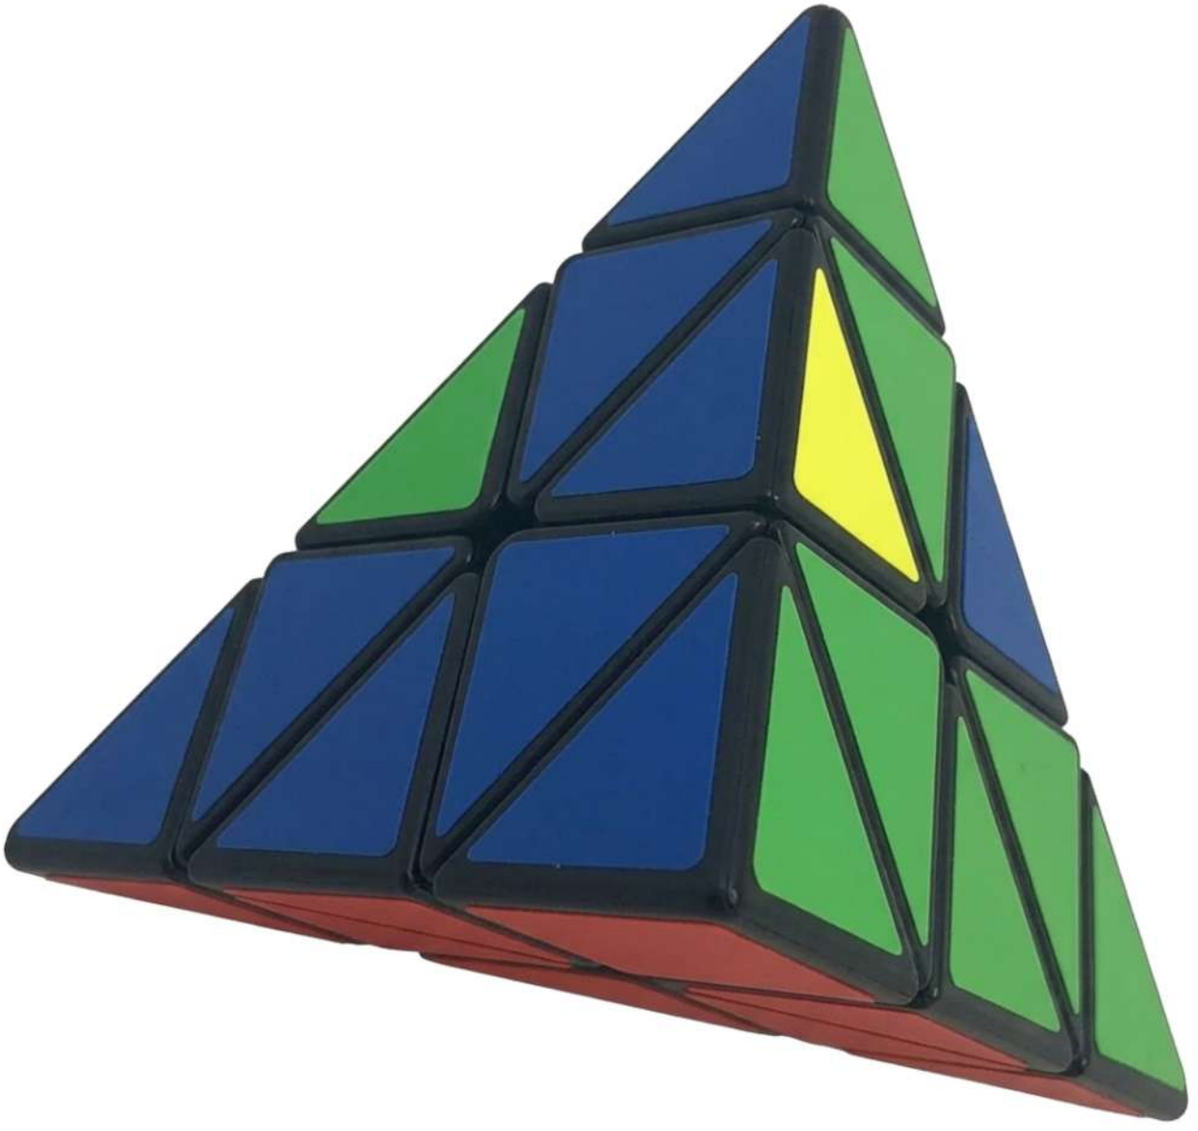

Make the red edge block in the plane,
this is very easy, try to understand;

Cube from another direction, to turn without the red base block into the next diagram;

General at this time there are three edge blocks direction or the wrong place, sometimes two. then you can swap any red-faced edge blocks as the switching point, and dislocation edge blocks, perhaps to swap a few times, you can restore.

Congratulations!
